90-Day Plan to master Agentic AI

Rushika Rai

Swipe next →

What Is Agentic AI?

Use tools dynamically

Reason independently

Agentic AI systems:

Maintain memory

Execute multi-step goals

This roadmap turns you into a builder not just a prompt user.

Month 1:
Foundations

(Days 1–30)

Rushika Rai

Rushika Rai

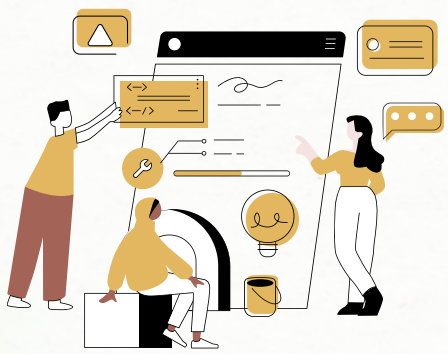
Swipe next →

Week 1:
Core Foundations

🎯 **Focus:** Programming + System Thinking

Python fundamentals

APIs & JSON



Learn:

Async workflows

Basic system design

Rushika Rai

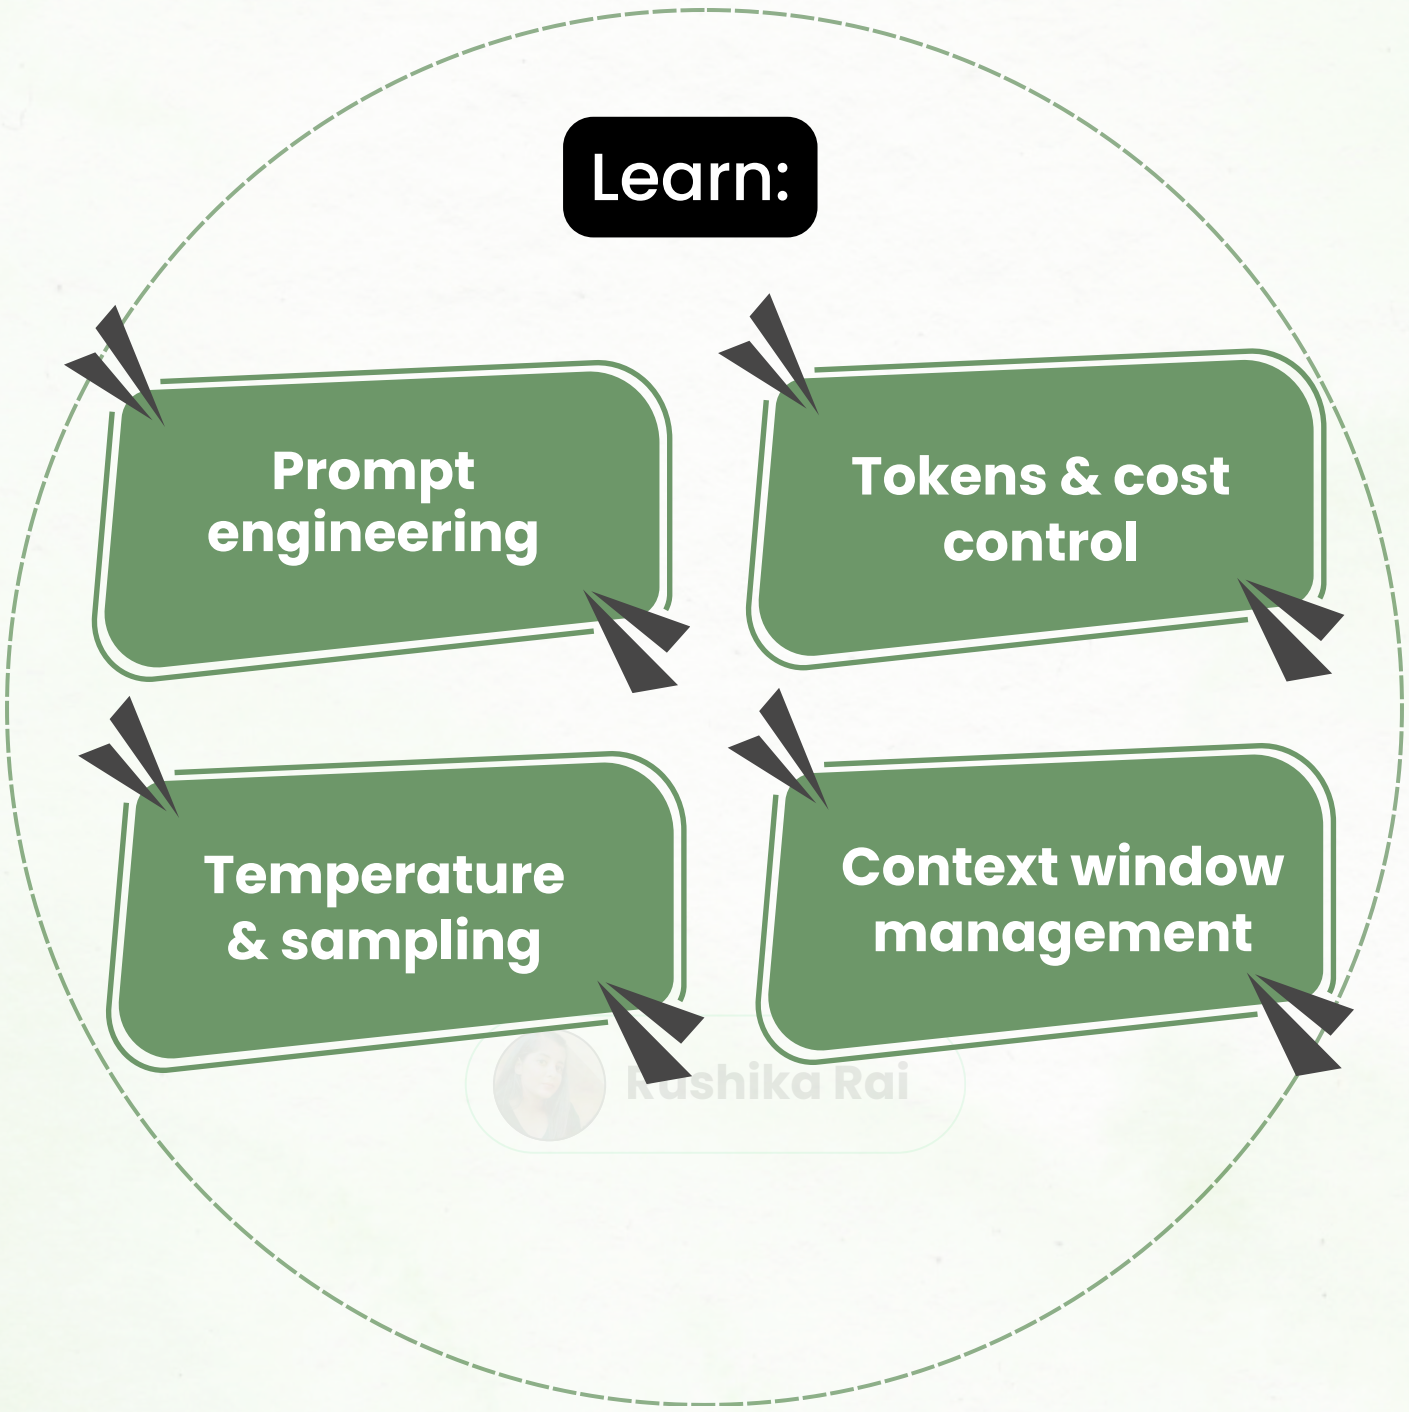
Goal: Build API-based mini projects.

Rushika Rai

Swipe next →

Week 2:
LLM Mastery

🎯 **Focus:** Model behavior & prompting



Goal: Create structured, reliable prompts.

Rushika Rai

Swipe next →

Week 3:
Retrieval & Memory

🎯 **Focus:** Context-aware intelligence

Learn:

- Embeddings
- Vector databases
- Semantic search
- RAG pipelines

Rushika Rai

Tools: Pinecone, Weaviate, Chroma

Goal: Build a RAG-based assistant.

Rushika Rai

Swipe next →

Week 4:
Agent Frameworks

🎯 **Focus:** Multi-step reasoning

Learn:

- LangChain basics
- Memory modules
- Tool calling
- Agent workflows

Rushika Rai

Tools: LangChain, CrewAI, AutoGen

Goal: Build your first functional AI agent.

Rushika Rai

Month 2:
Building Real Agents

(Days 31–60)

Rushika Rai

Rushika Rai

Swipe next →

Week 5-6:
Multi-Agent Systems

🎯 **Focus:** Collaboration between agents

Learn:

- Role-based agents
- Planner + Executor model
- Task decomposition
- Feedback loops

Rushika Rai

Goal: Build planner–executor architecture.

Rushika Rai

Swipe next →

Week 7:
Tool Integration

🎯 **Focus:** Real-world execution

Learn:

- API integrations
- Database actions
- File manipulation
- External app automation

Rushika Rai

Goal: Agent that performs real actions.

Rushika Rai

Swipe next →

Week 8:
Guardrails & Security

🎯 **Focus:** Safe autonomy

Learn:

- Prompt injection defense
- Output validation
- Role-based access control
- Monitoring systems

Rushika Rai

Goal: Production-safe agent prototype.

Rushika Rai

Swipe next →

Month 3:
Production & Mastery

(Days 61–90)

Rushika Rai

Rushika Rai

Swipe next →

Week 9–10: Deployment

🎯 **Focus:** Ship to real users

Learn:

- FastAPI
- Docker
- Cloud deployment
- CI/CD basics

Rushika Rai

Goal: Deploy live AI agent.

Rushika Rai

Swipe next →

Week 11:
Monitoring & Optimization

🎯 **Focus:** Scale intelligently

Learn:

- Logging & observability
- Drift detection
- Cost optimization
- Latency reduction

Rushika Rai

Tools: Arize AI, Prometheus, Grafana

Goal: Production-grade performance.

Rushika Rai

Swipe next →

Week 12:
Build Your Signature Project

🎯 **Focus:** Portfolio & credibility

Build one of these:

- Autonomous research agent
- AI sales assistant
- AI operations agent
- Multi-agent SaaS system

Rushika Rai

Final Outcome: You become an Agent Engineer, not just an AI user.
